PROFESSIONAL SUMMARY

Software Engineer with experience building backend applications using Python, Java, Spring Boot, Node.js, PostgreSQL, and MongoDB. Passionate about Artificial Intelligence, Machine Learning, and Generative AI, with a strong foundation in software engineering and problem solving. Experienced in designing RESTful APIs, authentication systems, database-driven applications, and writing clean, maintainable code. Currently expanding my expertise in AI engineering and eager to contribute to real-world AI products while learning from experienced professionals.

WORK EXPERIENCE

Software Engineer, *Olakz Logistics*

10/2025 – 05/2026

Lagos

- Led the full mobile frontend build of Olakz, a complex, high-traffic super-app with 10+ services including Ride, Marketplace, Food, Auto Wash/Mechanic, Spare Parts, Airtime/Data, and Transport Hire.
- Designed the application architecture, UI system, and navigation structure from the ground up.
- Implemented API integrations, map features, authentication flows, and global state management to support a seamless cross-platform mobile experience.
- Improved speed, reliability, and maintainability through component reusability, code optimization, and strict Git workflows.
- Partnered with backend engineering to refine endpoints, improve performance, and ensure a seamless user experience.

Stack: React Native, TypeScript, Redux Toolkit/Zustand, React Navigation, Axios, Git, Google Maps/AirMap SDK, REST APIs

Backend Engineer, *KonfirmTech Africa*

2025 – 12/2025

Software Engineer – Team Project *Property Listing Application with Map Integrations*

Lagos

- Contributed to backend API development supporting property listing, user management, and location-based search functionality.
- Designed efficient database interactions and query structures for property and geolocation data retrieval.
- Collaborated on application architecture decisions focused on scalability, maintainability, and security.
- Assisted in developing secure backend services supporting user profiles, authentication, and property management workflows.
- Participated in code reviews, sprint planning, and agile delivery processes to maintain engineering quality standards.

Stack: React, Next.js, TypeScript, Node.js, Express/NestJS, PostgreSQL, Google Maps API / Mapbox, Tailwind CSS, Git.

- **Lite Bank Platform:** Designed and implemented secure RESTful APIs supporting core banking workflows using Node.js, NestJS, and PostgreSQL.
- Developed role-based access control mechanisms and authentication flows to secure customer and administrative operations.
- Optimized database queries and data access patterns, improving application performance and maintainability.
- Applied test-driven development practices and CI/CD workflows to improve deployment reliability and software quality.
- Collaborated on backend architecture decisions to support scalable and extensible financial services functionality.
- **Rental Application (Java, Spring Boot, PostgreSQL, JWT, Paystack API):** Built backend services for authentication, booking management, payments, and notification workflows using Java, Spring Boot, and PostgreSQL.
- Integrated Paystack, Twilio, and EmailJS services to automate payment processing and customer communications.
- Implemented JWT-based authentication and role-based authorization for secure access management.
- Developed unit and integration tests to improve API reliability and reduce regression risks.
- Improved database efficiency through query optimization and structured relational data modeling.
- **Estate Gate Pass System & Hotel Management System:** Delivered responsive UIs and full-stack solutions with secure API integrations, showcasing expertise in scalable backends and modern frontend delivery.

Tech Stack: Python, Java, Spring Boot, Node.js, NestJS, PostgreSQL, MongoDB, Docker, Git, CI/CD

EDUCATION

Software Engineering Training, Semicolon Africa	2024 – 2025
National Diploma in Computer Science, Yaba College of Technology	2019 – 2022

TECHNICAL SKILLS

Backend

Python
Java (Spring Boot)
Spring MVC
Node.js (NestJS)
REST APIs
JWT Authentication
PostgreSQL
MySQL
MongoDB

Architecture & Systems

Microservices | Distributed Systems | Clean
Architecture | Hexagonal Architecture | CI/CD | Test-
Driven Development

Frontend

React | Next.js | React Native | TypeScript

Tools

Docker | Git | GitHub Actions | Postman | JIRA

PROJECTS

InvestNaija, *Nigerian Fintech Platform*, <https://web-production-c9eeb.up.railway.app>

- Designed and developed a fintech platform offering core banking, investments, and crypto trading.
- Led frontend development with React & TypeScript, integrating Node.js APIs.
- Optimized security and scalability, supporting 500+ simulated users.

Certificates

Electronic Arts Software

**Engineering virtual experience
program on Forage - September
2025**

- Proposed a new feature for the EA Sports College Football and wrote a Feature Proposal describing it to other stakeholders.
- Built a class diagram and created a header file in C++ with class definitions for each object.
- Patched a bugfix and optimized the EA Sports College Football codebase by implementing an improved data structure.

Learning

Currently learning

- Artificial Intelligence
- Machine Learning
- Generative AI
- AI Engineering
